

Build Your Own Solar Cooker

Collect your materials

Corrugated Cardboard (3x4 feet)
Aluminum Foil (1x10 feet)
Nontoxic, water-based glue (diluted 1:1 with water)
Paintbrush
Utility knife
Pencil/pen
Ruler

Make the Template

Following the measurements in the image at the bottom of the page, make the template using the corrugated cardboard.

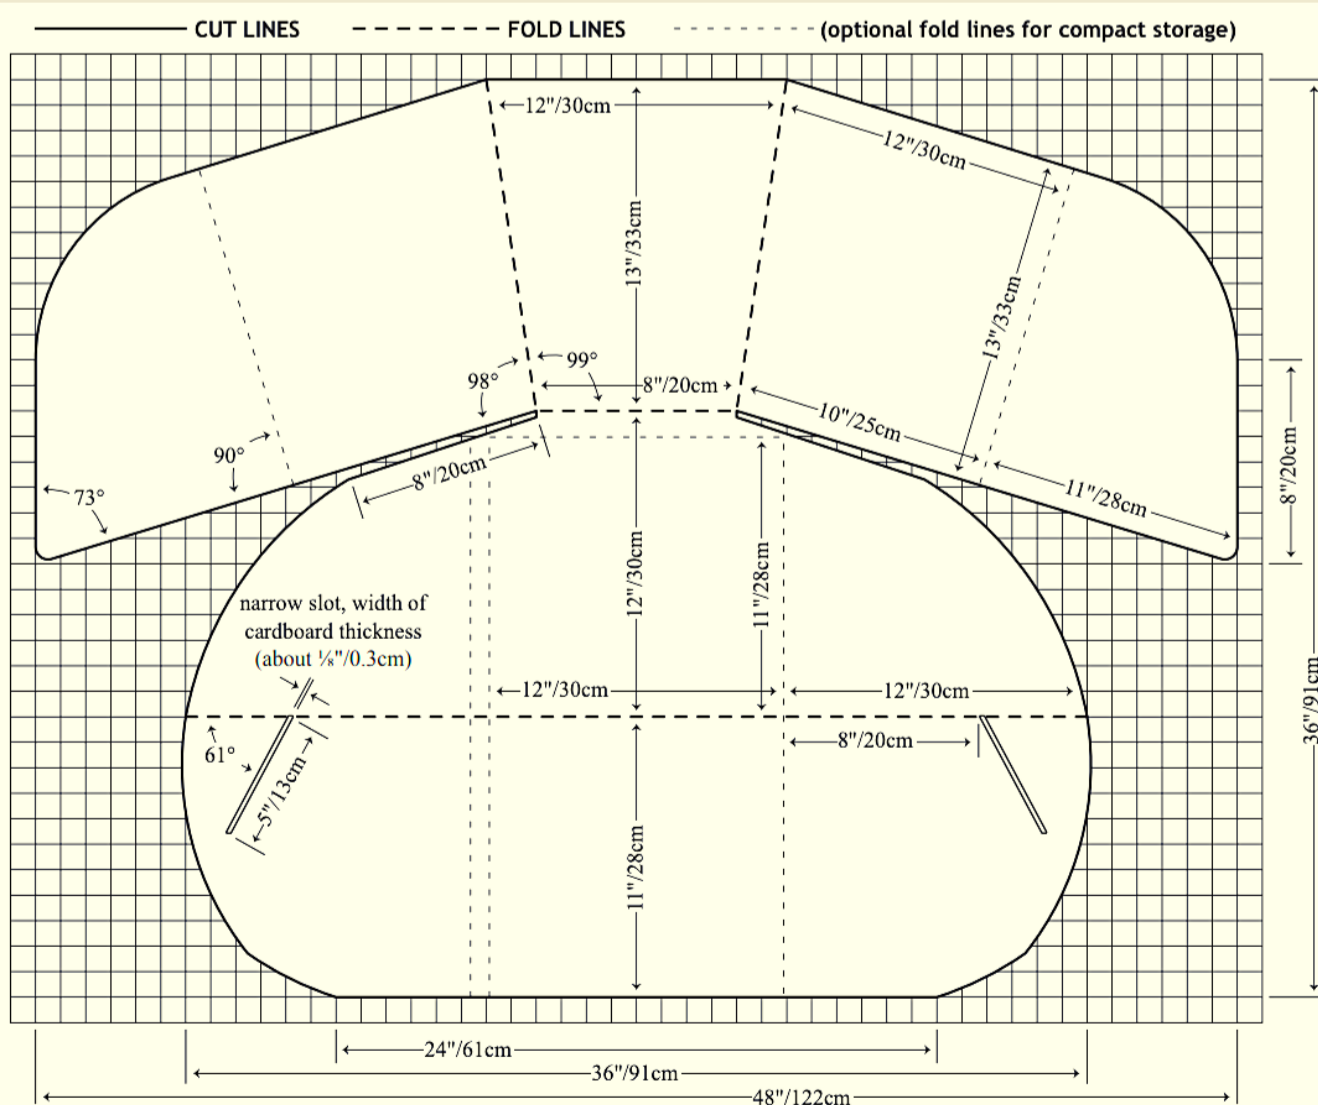

Score the fold lines using a blunt edge & make straight folds.

Glue on Aluminum Foil

Using the paintbrush, spread the diluted glue onto the dull side of the foil and press on to one full side of the cardboard.

Lay flat to dry!
